## SECRET

M/R I collaborated with [ ] on the page eight penetration possibility, which also promises an excellent chance to finish off the UJ DREADFUL case.

However, I must say that UJ DREADFUL's violent anti-ZIPER attitude, and pro-US act, and obvious fishing for a job do not cause me to believe that the machine result is not true. On the contrary, these factors may well indicate his great desire to get in the US service and his estimation that such tactics might accomplish this end. His desire to leave ZIPPER, as consistently confided to [ ], may represent nothing less than RIS recognition of a juicier target for an already well-placed agent.

Regardless of this point, I also am not convinced of the accuracy of the CARRIAGE result and think in any case the general line of action described on page 8 is worth giving highest consideration.

Assuming UJDREADFUL can be cleared (! quite an assumption) and could be worked up as a ZIPPER penetration, we might be able to slip him in as a ZIPPER Carriage expert. Certainly he would make a good one, and we could perhaps work things in such a way as to make him attractive to ZIPPER in this capacity. His language qualifications would also make him useful in this connection. A change in position of this type might satisfy him and ease his restlessness, perhaps also make it possible for him to live somewhere besides Munich. Also such a position would make him more valuable as a penetration as it would remove him from a relatively isolated field position and give him access to more generalized knowledge of ZIPPER operations.

---

Concur w/comments of 25.4061<sup>alt</sup>. As previously stated, the present Zipper handling is not very likely to produce any concrete results. It was accepted by us merely as a phase in the handling of the case which offered - at least theoretically - the opportunity of checking out certain possibilities. Also, it was far preferable to Zipper's original proposal which was somewhat blunt and naive and didn't include any provision for retesting. Certainly concur with 25.50/C that the only way the case is ever likely to be cleared up is with the machine, and the main problem here is to arrange a test in a smooth manner acceptable both to Zipper and to Dreadful. I doubt very much that Zipper would be willing to consider him as a possible candidate for Carriage training; however, they might agree to using it as a ruse to get him to agree to a retest.
